RSC YOUNG CHEMIST AWARD

WEBSITE CONTENT INVENTORY

Every piece of evidence the judges must see — item by item

Total Items: 127 | Pages: 8 + 3 sub-pages | Date: 24 March 2026

Master Summary

This document catalogues every single piece of content, evidence, file, data point, and media asset that must appear on the CATS Insights website for the RSC submission. Each item is numbered, tagged with its file format, and mapped to the RSC category it serves.

Website Page	Items	Files	PDFs	Images	RSC Category
1. Home	12	0	0	1	All
2. About	18	3	3	8+	Legacy
3. Chemistry of Kent	21	3	3	3	Cat. 2 + 5
4. Teaching Resource	11	2	1	3	Cat. 1
5. Workshop	22	4	5	6–10	Cat. 3 + 4
6. Mentoring	19	1	3	5+	Cat. 4
7. Digital Outreach	14	1	0	12+	Cat. 5
8. Impact Report	10	1	1	0	All

Page 1: HOME (index.html)

The judge's entry point. Must communicate who you are, what you built, and where to find every piece of evidence within 10 seconds of landing.

Hero Section

1. CATS Insights logo (high-resolution PNG, transparent background) *[Image]*
2. Headline: "CATS Insights" + tagline: "Real Science. Real Writing. Real Kent." *[Text]*
3. Mission statement (2–3 sentences): Student-led STEM publication from The Worthgate School, Canterbury. Founded to give A-Level students a platform to engage with real

academic research. Professional editorial standards, structured mentoring, digital outreach connecting students to the chemistry of Kent. *[Text]*

RSC Category Mapping Table

4. Category Mapping Table with 5 rows showing: RSC Category number, Category name, Your CATS Insights activity, Key evidence location. This is the single most important navigation aid — judges see exactly what you deliver for each category and where to find the proof. *[HTML Table]*

Evidence Navigation Cards (6 cards)

5. Card: Teaching Resource — $CaCO_3$ infographic for A-Level classrooms → links to teaching-resource.html *[Link]*
6. Card: Chemistry of Kent — Blog articles on White Cliffs, Pfizer Sandwich, Hop Chemistry → links to chemistry-of-kent.html *[Link]*
7. Card: Workshop — "Writing Chemistry for Non-Chemists" STEM event → links to workshop.html *[Link]*
8. Card: Mentoring — Lead Writer editorial feedback system with measurable impact → links to mentoring.html *[Link]*
9. Card: Digital Outreach — Instagram and website promoting chemistry to a wider audience → links to digital-outreach.html *[Link]*
10. Card: Impact Report — Full report + project video → links to impact-report.html *[Link]*

Footer (appears on every page)

11. "CATS Insights © 2026 | The Worthgate School, Canterbury, Kent | @catsinsights" *[Text]*
12. Navigation links to all pages + Instagram link *[Links]*

Page 2: ABOUT CATS INSIGHTS (about.html)

Proves this is not a one-person school club. Shows institutional depth, governance, and sustainability. Directly supports the "institutional legacy" RSC keyword.

Organisation Overview

1. What is CATS Insights: founding story, the problem it solves (no platform for A-Level students to engage with real academic research), when founded, by whom *[Text]*
2. Key statistics displayed as large bold numbers: "27 Members" | "3 Organisational Tiers" | "48 Foundational Documents" | "7 Document Suites" *[Text/Design]*

Team Section (minimum 7 cards)

3. Jason — Founder & President: photo, role, one-line quote *[Image + Text]*
4. Alex — Vice President: photo, role, quote about proofreading/quality *[Image + Text]*
5. Grisha — Lead Editor: photo, role, quote about editorial process *[Image + Text]*
6. Cindy — Head of Academic Development: photo, role, quote about QA *[Image + Text]*
7. Philip — Lead Writer: photo, role, quote about content creation *[Image + Text]*
8. Nana — Design Lead: photo, role, quote about visual identity *[Image + Text]*
9. Duc — Secretary / Media: photo, role, quote about documentation *[Image + Text]*

(Add additional team members if desired — more faces = more credibility)

Organisational Structure

10. 3-Tier Structure description: Strategic Tier (President, VP, Secretary), Operational Tier (Lead Editor, Head of Academic Development), Execution Tier (Writers, Editors, Design Team) *[Text]*

11. Organisational Chart visual (PDF or embedded image showing the hierarchy with role names) *[PDF/Image]* → **Cat. Legacy**

Governance & Quality Assurance

12. Foundational Document Library: 48 documents across 7 suites (Governance, Writers, Editors, Design, QA, Production, Operations) *[Text]*

13. Quality Assurance Pipeline: 4-stage audit — Technical Edit → Line Edit → QA Gate (colour-coded GREEN/AMBER/RED/BLACK) → Final Approval *[Text/Diagram]*

14. Turnitin screening (<15% similarity threshold) *[Text]*

15. GPTZero AI detection screening *[Text]*

16. Oxford referencing with DOIs as default citation standard *[Text]*

Succession Planning

17. Every leadership role has a designated deputy *[Text]*

18. The Succession Test: a new team could publish Edition 1 within 6 months using documented systems alone *[Text]*

Downloadable Files for This Page

A. Operations_Manual_Summary.pdf — 1–2 page extract showing governance structure, succession plan, key protocols *[PDF]*

B. QA_Protocol_Summary.pdf — 1-page extract showing Turnitin, GPTZero, citation verification, colour-coded scoring *[PDF]*

C. Organisational_Chart.pdf — visual of 3-tier structure *[PDF]*

Page 3: CHEMISTRY OF KENT (chemistry-of-kent.html)

Blog index page + 3 full-length articles. This is your strongest evidence for Category 2 (History of Chemistry) and contributes to Category 5 (Digital Outreach). The articles demonstrate academic rigour, accessible writing, Oxford referencing, and Kent-local content.

Blog Index Page

1. Page title: "Chemistry of Kent: Connecting Students to Local Science" *[Text]*

2. Page subtitle: "Exploring the chemistry happening right here in Kent" *[Text]*

3. Article Card 1: "The Chemistry of the White Cliffs of Dover" — thumbnail image, description, date, link to white-cliffs.html *[Card]*

4. Article Card 2: "The Pfizer Sandwich Legacy: How a Kent Laboratory Changed Modern Medicine" — thumbnail, description, date, link to pfizer-sandwich.html *[Card]*

5. Article Card 3: "The Chemistry of Kent Hops" — thumbnail, description, date, link to hop-chemistry.html *[Card]*

Article 1: White Cliffs of Dover (white-cliffs.html)

6. Title, subtitle ("70 million years of chemistry in one cliff face"), author ("CATS Insights Editorial Team"), publication date *[Text]*

7. Section: Introduction — Kent connection, why this matters, hook for the reader *[Text (~200 words)]*

8. Section: Formation — Coccolithophores (phylum Haptophyta), biogenic $CaCO_3$, Late Cretaceous (≈70–100 Ma), chalk as compressed coccolith skeletons *[Text (~300 words)]*

9. Section: Chemical Erosion — Equation: $CaCO_3(s) + H_2CO_3(aq) \rightarrow Ca(HCO_3)_2(aq)$. Carbonic acid from atmospheric CO_2, dissolution of chalk, 0.5–1.0 cm/year erosion rate, climate change acceleration *[Text (~300 words)]*

10. Section: Thermal Decomposition — Equation: $CaCO_3(s) \rightarrow CaO(s) + CO_2(g)$ at ~825°C. Quicklime production, cement, steelmaking, water treatment, A-Level core content *[Text (~250 words)]*

11. Section: Environmental Significance — Carbon cycle, geological sequestration, feedback loop, Green Chemistry angle *[Text (~250 words)]*

12. Section: The Kent Connection — Medieval lime kilns, Canterbury construction, White Cliffs as cultural/chemical landmark *[Text (~200 words)]*

13. Reference list — minimum 3 academic sources in Oxford format with DOIs (e.g., Gale 2018, Ridgwell & Zeebe 2005) *[References]*

14. Editorial Note: "This article was screened using Turnitin (<15% similarity) and GPTZero (AI detection). All claims are referenced using Oxford referencing." *[Text box]*

Article 2: Pfizer Sandwich (pfizer-sandwich.html)

15. Full article (~1,800 words) covering: Origins (1952 Folkestone, 1954 Sandwich, 1957 six scientists, 1971 Pfizer Central Research), Fluconazole (lanosterol 14α-demethylase inhibition, ergosterol synthesis disruption, Ken Richardson's story), Sildenafil (NO/cGMP/PDE5 pathway, IC_{50} = 3.5 nM, clinical pivot from angina to ED, Revatio for PAH), Full portfolio (amlodipine, doxazosin, voriconazole, maraviroc), Discovery Park (160+ companies, Carbon 6 Academy), Conclusion *[Text]* → **Cat. 2 + 5**

16. Reference list — 6 sources with DOIs (Richardson et al. 1990, Osterloh 2004, NIHF records, Pfizer UK corporate history) *[References]*

17. Editorial Note (same Turnitin/GPTZero disclosure) *[Text box]*

Article 3: Kent Hop Chemistry (hop-chemistry.html)

18. Full article covering: Kent's "Garden of England" hop-growing heritage, Alpha-acid chemistry (humulone isomerisation during brewing), Beta-acids (lupulone, oxidation, shelf stability, degradation pathways), Terpenes and flavour (myrcene, linalool, geraniol — organic chemistry of aroma), Modern applications (hop extracts in pharmaceuticals, antimicrobial research) *[Text]* → **Cat. 2 + 5**

19. Reference list with DOIs *[References]*

20. Editorial Note *[Text box]*

Downloadable Files

21. Each article available as downloadable PDF with full references visible (3 PDFs total) *[PDF ×3]*

Page 4: TEACHING RESOURCE (teaching-resource.html)

Your only evidence for Category 1 (Non-Core Practical / Teaching Resource). Without this page, you have a gap. The RSC specification says: "Create a resource for teaching, preferably including a video or infographic."

The Infographic

1. $CaCO_3$ infographic displayed large and viewable on the page (embedded image, high resolution) *[Image]*
2. Infographic content must include all 6 sections: (1) Title & Hook, (2) What Is $CaCO_3$?, (3) Key Reactions (3 equations with state symbols), (4) Real-World Applications, (5) The Kent Connection, (6) Footer/Branding *[Content within image]*
3. Download button: A3 PDF (297mm × 420mm, 300 DPI, print-quality) *[PDF download]*
4. Download button: Instagram version (1080×1350px PNG) *[PNG download]*

Proof of Teaching Use

5. Teacher acknowledgement message — screenshot or quoted text from Chemistry teacher confirming they received the infographic and will use it in lessons *[Image/Quote]*
6. Photo of the infographic printed on A3 and displayed in the classroom (or handed to teacher) *[Image]*

Digital Reach

7. Screenshot of the infographic posted on Instagram with teaching resource caption *[Image]*
8. Post analytics after 48 hours: Reach, Impressions, Saves, Shares *[Data/Screenshot]*

Description Section

9. "About This Resource" — brief explanation of what the infographic covers, why $CaCO_3$ was chosen (ties to White Cliffs content, A-Level core curriculum), design process *[Text]*
10. Chemical equations displayed correctly on the page: $CaCO_3(s) \rightarrow CaO(s) + CO_2(g)$, $CaCO_3(s) + 2HCl(aq) \rightarrow CaCl_2(aq) + H_2O(l) + CO_2(g)$, $CaCO_3(s) + H_2O(l) + CO_2(g) \rightarrow Ca(HCO_3)_2(aq)$ *[Text]*
11. CATS Insights branding visible on the infographic: logo, @catsinsights, "Produced by CATS Insights | The Worthgate School" *[Design element]*

Page 5: WORKSHOP (workshop.html)

Evidence for Category 3 (STEM School Event) and feeds into Category 4 (Mentoring). This is your highest-value evidence piece because it hits two categories simultaneously. Judges need to see: it happened, students attended, they learned something measurable, and materials were professional.

Event Overview

1. Workshop title: "Writing Chemistry for Non-Chemists" *[Text]*
2. Event details card: Date [fill in], Duration: 45 minutes, Facilitator: Jason Ye Yint (Founder & President), Location: The Worthgate School *[Text]*

3. Number of attendees: [X] CATS Insights members from Years [Y–Z] *[Data]*
4. Learning Objectives: (1) Distinguish between 3 audience levels (Expert, Educated Non-Specialist, General Public), (2) Apply PEEL paragraph structure to science writing, (3) Self-assess using Three-Test Framework (Specialist Test, Peer Test, Citation Test) *[Text]*

Photo Gallery

5. Photo: Room setup before workshop *[Image]*
6. Photo: Jason teaching / presenting to the group *[Image]*
7. Photo: Students doing the group exercise ("Fix This Paragraph") *[Image]*
8. Photo: Student presenting or sharing their rewrite *[Image]*
9. Photo: Group collaboration / discussion *[Image]*
10. Photo: Group photo of all attendees at the end *[Image]*

(5–10 photos minimum. All renamed systematically: Workshop_01_RoomSetup.jpg etc.)

Video

11. Workshop highlight video embedded from YouTube (2–3 minutes, Unlisted). Clips of teaching block and group exercise. *[YouTube embed]*

Workshop Materials (downloadable PDFs)

12. 3-Level Framework Handout (PDF) — the core teaching tool showing Level 1 (Expert), Level 2 (Educated Non-Specialist — CATS target), Level 3 (General Public) with $CaCO_3$ examples, Three-Test Framework, and key techniques for Level 2 writing *[PDF download]*
13. "Fix This Paragraph" Exercise Sheet (PDF) — the Level 1 paragraph students rewrite during the group exercise, with jargon identification box and self-assessment checklist *[PDF download]*
14. Topic Menu Handout (PDF) — list of available CATS Insights writing topics *[PDF download]*
15. Presentation Slides (PDF) — the full slide deck exported from Canva/PowerPoint *[PDF download]*

Impact Data

16. Attendance sheet (scan or Google Form export) showing names and year groups *[PDF/Image]*
17. Quantitative outcomes: Pre-workshop [X]% could not identify Level 2 writing. Post-workshop [Y]% successfully rewrote to Level 2. Follow-up: [Z]% submitted 300-word drafts within 7 days. Average jargon reduction: [N]%. *[Data table]*
18. Measurable improvement sample: "Student A Draft 1: 12 undefined technical terms, avg sentence length 38 words. Student A Draft 2: 3 terms (all defined), avg sentence length 19 words. Clarity improvement: +65%." *[Data]*

Student Feedback

19. Student quote 1: about what they learned from the workshop *[Quote card]*
20. Student quote 2: about how the feedback improved their writing *[Quote card]*
21. Student quote 3: about whether they would recommend CATS Insights *[Quote card]*

Workshop Impact Report

22. 1-page Workshop Impact Report (embedded as text or downloadable PDF): Title, date, facilitator, attendees, learning objectives, quantitative outcomes, qualitative feedback, measurable improvement sample *[PDF/Text]*

Page 6: MENTORING (mentoring.html)

Evidence for Category 4. The judges do not care that you "helped students write better." They care that you can prove it with data. This page must show: (1) you built a system, (2) the system ran, (3) students measurably improved.

Editorial Workflow Diagram

1. Visual flowchart showing the 6-stage editorial pipeline: Stage 1: Writer submits Draft 1 via Google Form/Drive → Stage 2: Lead Editor (Grisha) reviews using 3-Level Framework + PEEL checklist → Stage 3: Written feedback returned via Teams using Feedback Summary Template → Stage 4: Writer revises and submits Draft 2 → Stage 5: Final review: marked "editorial-ready" or "needs further revision" → Stage 6: Editorial-ready articles enter QA pipeline (Turnitin, GPTZero, citation check) *[Image/Diagram]* → **Cat. 4**
2. Diagram must use CATS Insights brand colours (Harrow Blue #0C2340, Gold #89764B) and label each stage with the role responsible *[Design]*

Before/After Case Studies (minimum 3 students)

Each case study is a side-by-side comparison card with anonymised student data.

3. Case Study: Student A — Metrics table showing Draft 1 vs Draft 2: *[Data card]*

- Unexplained jargon terms: [X] → [Y]
- Average sentence length (words): [X] → [Y]
- PEEL structure adherence: [X]% → [Y]%
- Writing Level (1/2/3): Level [X] → Level [Y]
- Citations included: [X] → [Y]

4. Case Study: Student B — same metrics table format *[Data card]*
5. Case Study: Student C — same metrics table format *[Data card]*
6. Downloadable Before/After Samples PDF: all 3 case studies in one document with Draft 1 excerpt (200–300 words) in left column, revised draft in right column, quantitative metrics table at bottom *[PDF download]*

Student Testimonials

7. Testimonial quote 1: about learning to structure scientific arguments *[Quote card]*
8. Testimonial quote 2: about how editorial feedback improved their writing *[Quote card]*
9. Testimonial quote 3: about the 3-Level Framework / explaining chemistry for non-specialists *[Quote card]*
10. Testimonial quote 4 (optional): about recommending CATS Insights *[Quote card]*
11. Testimonial quote 5 (optional): additional strong quote *[Quote card]*
12. Downloadable Student_Testimonials.pdf: all quotes compiled in one document *[PDF download]*

Evidence of the System in Action

13. Screenshot 1: Actual written feedback given to a writer in Teams/Google Docs *[Image]*

14. Screenshot 2: A different feedback example showing the revision cycle (Draft 1 → Feedback → Draft 2) *[Image]*
15. Screenshot 3: Google Drive showing organised article folders with Draft 1, Feedback, Draft 2 visible *[Image]*
16. Screenshot of a completed Feedback Summary Template for at least 1 article *[Image]*

The Mentoring Impact Tracker

17. Summary data from the Mentoring_Impact_Tracker spreadsheet: Number of writers mentored, topics covered, average improvement percentages *[Data table]*
18. Downloadable Mentoring_Impact_Tracker.xlsx *[Spreadsheet download]*

Lead Writer System Documentation

19. 1-page document titled "CATS Insights Editorial Feedback Workflow" showing the complete pipeline (can be the same as item 1 but as a downloadable PDF) *[PDF download]*

Page 7: DIGITAL OUTREACH (digital-outreach.html)

Evidence for Category 5. The judges will never visit your Instagram directly. They will see this page. Every post, every metric, every screenshot must be here. Saves and shares matter more than likes — they indicate content users found valuable enough to return to or recommend.

Summary Metrics (4 large stat cards)

1. Total Posts Published: [X] chemistry-focused posts over [Y] weeks *[Data]*
2. Total Reach: [N] unique accounts reached (sum across all posts) *[Data]*
3. Total Saves: [X] (key metric — high saves = valuable educational content) *[Data]*
4. Follower Growth: From [A] → [B] (Δ = [C] followers, [D]% growth) *[Data]*

Post Gallery (6 posts minimum)

5. Post 1: "What is CATS Insights?" — carousel screenshot, date (15 Feb), reach, saves, shares *[Image + Data]* → **Cat. 5**
6. Post 2: "Chemistry of Kent: White Cliffs of Dover" — carousel screenshot, date (19 Feb), reach, saves, shares *[Image + Data]* → **Cat. 2 + 5**
7. Post 3: "Meet the Team" — carousel screenshot, date (21 Feb), reach, saves, shares *[Image + Data]* → **Cat. 4 + 5**
8. Post 4: "Chemistry of Kent: Pfizer Sandwich" — carousel screenshot, date (26 Feb), reach, saves, shares *[Image + Data]* → **Cat. 2 + 5**
9. Post 5: "Workshop Recap" — carousel screenshot, date, reach, saves, shares *[Image + Data]* → **Cat. 3 + 5**
10. Post 6: "Chemistry of Kent: Hop Chemistry" or $CaCO_3$ Infographic — screenshot, date, metrics *[Image + Data]* → **Cat. 2 + 5**

Analytics Evidence

11. Full Metrics Log table: Date | Post # | Topic | Type | Reach | Impressions | Saves | Shares | Comments | Follower Count — one row per post *[HTML Table]*
12. Account-level Instagram screenshots: Accounts Reached (7-day and 30-day), Accounts Engaged, audience demographics if available *[Images]*

Engagement Analysis

13. Callout: "Instagram's algorithm weights engagement signals: Shares/Sends > Saves > Comments > Likes. Saves and shares demonstrate that people found content valuable enough to return to or recommend. CATS Insights posts are structured to drive saves through actionable information (equations, frameworks, checklists) and explicit save CTAs." *[Text]*

Live Link

14. Link to Instagram: "Follow @catsinsights on Instagram" (opens in new tab) *[External link]*

Page 8: IMPACT REPORT (impact-report.html)

The centrepiece. This is the single document that tells judges: "Here is everything I did, here is the evidence, and here is why it matters." The full report is rendered as web text (not just a PDF link) so judges can read it without downloading anything. The project video gives judges a visceral sense of the project that no PDF can replicate.

Project Video

1. YouTube video embedded at top of page (2:00–2:30, Unlisted). Structure: Hook (0:00–0:20) → What It Is (0:20–1:00) → Impact (1:00–1:40) → Kent Connection (1:40–2:00) → Legacy (2:00–2:30) *[YouTube embed]*

Impact Report Content (rendered as web text)

2. Section A: Executive Summary (200–250 words) — Who, What, Problem, Solution, Scale. Third person throughout. *[Text]* → **Cat. All**
3. Section B: RSC Category Mapping Table — 5 rows showing category, activity, key evidence *[Table]* → **Cat. All**
4. Section C: Workshop Outcomes — attendance, pre/post data, follow-up submission rate, 1–2 student quotes *[Text + Data]* → **Cat. 3**
5. Section D: Mentoring Metrics — number mentored, average jargon reduction %, sentence length improvement, sample case study *[Text + Data]* → **Cat. 4**
6. Section E: Digital Reach — total posts, total reach, saves, shares, follower growth, content themes *[Text + Data]* → **Cat. 5**
7. Section F: Governance & Sustainability — 27-member team, 48 documents, succession plan, 4-stage QA pipeline *[Text]* → **Cat. Legacy**
8. Section G: Closing Statement — "CATS Insights is not a personal project; it is an institutional platform designed to promote chemistry to a wider audience and democratise access to academic publishing." *[Text]*

RSC Keywords Verification

9. All 9 keywords must appear in the report: Academic excellence, Promotion of chemistry, Creativity and latest technology, Community engagement, Mentoring impact, Diversity and accessibility, Sustainability, Institutional legacy, Role models *[Embedded in text]*

Download

10. Download button: "Download Impact Report PDF" — the same report as a branded 2–3 page PDF with CATS Insights design *[PDF download]*

Bonus: Items NOT on the Website but Required for Submission

These items are submitted through the Google Form by your teacher, not hosted on the website. But they must be prepared and ready.

---

1. Teacher Nomination Text (400–500 words) — you draft it, teacher reviews and submits via Google Form. Must include: name/school/qualification, what CATS Insights is, 5 categories addressed, specific impact numbers, institutional legacy, all 9 RSC keywords woven in naturally *[Text (Google Form)]*
2. Website URL — the link to your live website (e.g., catsinsights.netlify.app or catsinsights.co.uk). This is submitted in the Google Form as the evidence link. *[URL]*
3. YouTube Video URL — the Unlisted link to your project video. Also embedded on the website but submitted separately in the form. *[URL]*
4. Teacher review meeting — walk your teacher through the website before they submit. Print a 1-page summary showing the 8 pages and what's on each. *[Meeting]*
5. Google Form confirmation screenshot — after teacher submits, screenshot the confirmation page *[Screenshot]*

THE MASTER FILE COUNT

Total content items across all 8 pages: ~127PDFs to create: ~14 (articles, infographic, workshop materials, Impact Report, summaries, org chart, mentoring docs)Images to capture: ~30–40 (workshop photos, Instagram screenshots, feedback screenshots, team photos, infographic photos, analytics screenshots)Data points to fill: ~50+ (metrics, attendance, before/after numbers, follower counts)Articles to write/paste: 3 (White Cliffs, Pfizer Sandwich, Hop Chemistry)Videos: 1 project video (YouTube Unlisted) + optional workshop highlight reelQuotes to collect: 5–8 student testimonials

---

If it is not on this list, it does not need to be on the website.If it IS on this list and it is missing, the submission has a gap.
